

Custom Platforms

Each Ultra platform is custom manufactured utilizing our CAD design build process. This ensures your platform accurately meets the application requirements and exceeds your expectations.

Ultra's fiberglass platforms are completely factory assembled and tested to ensure quality. Platforms are then broken down for shipping and marked for easy assembly in the field. This reduces installation costs and improves efficiency.

The lightweight characteristic of structural fiberglass facilitates simple on-site assembly and reduces shipping costs. Our platforms meet or exceed all OSHA standards and can be designed to comply with International Building Code (IBC) standards.

- Non-Conductive - Heat & Electric
- Maintenance Free
- Light Weight
- High Strength
- Corrosion Resistant
- Safety Yellow Color
- Non-slip UltraGrit™ surface
- Fire Retardant
- Exceeds OSHA and IBC standards
- Ideal for wash-down in food applications per NSF
