

Fiberglass Battery Racks

Non-conductive, corrosive resistant, pultruded fiberglass structural shapes lend themselves very well to battery supports and racks. Racks can be used for charging, changing, transporting or storing batteries. Ultra will custom design and fabricate battery storage units to meet your specific needs. Battery covers and shelves are also available. Our Vinyl Ester (Series 1625) resin is the best choice for reliable, long term support of batteries and other corrosive containers.

Ultra also offers portable battery racks.
