

Ladder Up

Order your fiberglass ladder with a "ladder up" device that allows a person to climb down or up with the security of an extended grab bar. Stepping up and out onto a roof is easier and more secure. Stepping down, a person stays upright and feels more balanced. If your ladder is inside a tank, it makes finding that first step or rung much easier while holding onto the grab bar.

The bar extended or retracts as needed. Available in stainless steel, aluminum, and painted steel.

A great addition to your ladder application. Ask your Ultra representative for more details.
